

Charles Johnston

charles.ward.johnston@gmail.com · (404) 992-4825 [Github](#) | [Website](#)

Software Developer with 5 years of professional application development experience and current controls software engineering experience in warehouse automation. Skilled at designing, implementing, and documenting scalable software solutions in collaborative, deadline-driven environments.

Skills

Programming Languages: Python, Swift, Objective-C, Go, JavaScript, SQL, HTML, CSS

Backend & APIs: RESTful services, WebSockets, PostgreSQL

Tools & Platforms: Git, Docker, Xcode, VS Code, iOS Platform, JIRA

Practices: OOP, Agile, SCRUM, Design Patterns, JWT Authentication

Machine Learning: Regression, Gradient Descent, TensorFlow/Keras, XGBoost

Experience

- | | |
|---|---------------------|
| Controls Software Engineer II Honeywell | Oct 2025 – Present |
| <ul style="list-style-type: none">• Configure and test controls software for automated conveyor and distribution systems.• Troubleshoot I/O and integration issues during commissioning and site support. | |
| HVAC Technician Aire Central | Sep 2019 – Jul 2024 |
| <ul style="list-style-type: none">• Diagnosed and resolved complex residential and commercial HVAC system issues.• Managed on-site projects, delivering customer satisfaction in high-pressure environments. | |
| iOS/tvOS Application Developer Foothills Consulting Group | Aug 2015 – Jun 2018 |
| <ul style="list-style-type: none">• Collaborated with back-end team to develop next-generation mobile application features.• Resolved high-priority issues and led integration of Download-And-Go and Cloud DVR capabilities.• Enabled remote and in-home set-top box control for customers.• Performed in-depth video stream debugging and network analysis using Charles Proxy. | |
| iOS Application Developer Unbounded Solutions | Jun 2013 – Aug 2015 |
| <ul style="list-style-type: none">• Developed full lifecycle application features from design through deployment.• Integrated Google Places API and optimized background processing with GCD for responsive UIs.• Added label printer support to iOS point-of-sale app without requiring an AirPrint server.• Refactored order management to run in the background using GCD, preventing UI lockups. | |

Education

- | | |
|--|---------------------|
| Deep Learning Specialization - Coursera | Jan 2025 – Apr 2025 |
| Machine Learning Specialization - Coursera | Jul 2024 – Oct 2024 |
| Boot.dev – Python, OOP, Linux, Go, Git, Functional Programming | Feb 2024 – Sep 2024 |
| Associates Degree in Game Development - Gwinnett Technical College | Aug 2010 – May 2012 |

Projects

- | | |
|--|---------------------|
| Planeboard | Jun 2025 – Present |
| <ul style="list-style-type: none">• Real-time multiplayer web app built with Go backend and React frontend.• Designed and implemented concurrency-safe backend to manage rooms, players, and game state.• Integrated WebSockets for real-time communication and game interactions. | |
| MTG Game Predictor | Mar 2025 – Jun 2025 |
| <ul style="list-style-type: none">• Full-stack app with Go backend, PostgreSQL database, and Docker-based E2E testing.• Designed multiple ML models and implemented REST APIs for predictions.• Built JWT-based authentication and maintained version-controlled codebase. | |
| Bonk | Nov 2024 – Jan 2025 |
| <ul style="list-style-type: none">• Developed and released a rhythm-based idler game in Unity (C#), combining real-time pendulum motion simulation with polyrhythmic audio generation• Integrated Steamworks SDK and published the game on Steam, reaching a global player base | |
| AI Chess Engine | Sep 2024 – Nov 2024 |
| <ul style="list-style-type: none">• Developed reinforcement-learned chess AI using TensorFlow and Python.• Designed frontend UI and coordinated backend/frontend integration for gameplay. | |
