

# Charles Johnston

charles.ward.johnston@gmail.com · (404) 992-4825 [Github](#) | [Website](#)

Software Developer with 6 years of professional application development experience and current controls software engineering experience in warehouse automation. Skilled at designing, implementing, and documenting scalable software solutions in collaborative, deadline-driven environments.

## Skills

---

**Programming Languages:** Python, Swift, Objective-C, Go, JavaScript, SQL, HTML, CSS

**Backend & APIs:** RESTful services, WebSockets, PostgreSQL

**Tools & Platforms:** Git, Docker, Xcode, VS Code, iOS Platform, JIRA

**Practices:** OOP, Agile, SCRUM, Design Patterns, JWT Authentication

**Machine Learning:** Regression, Gradient Descent, TensorFlow/Keras, XGBoost

## Experience

---

- |                                                                                                                                                                                                                                                                                                                                                                                                                                               |                     |
